CHICAGO AND NASHVILLE LIMITED.

The best train connecting Chicago with all points South of Nashville is the Chicago and Nashville Limited. It arrives in Nashville from Chicago in good time for breakfast, where immediate connections are made for all points South. Going North it leaves Nashville in the evening upon the arrival of the various Southern trains. It is well equipped; carrying through Pullman cars between Chicago and Nashville. Out from Chicago an elegant 6 o'clock dinner is served in the Dining car, and going toward Chicago an excellent breakfast is served on the train. The meals and service on these trains are not to be excelled anywhere. We pass over this route frequently and speak from experience.

IF YOU ARE GOING

East, West, North, South,

You will save time and trouble by buying tickets over the

Place for next meeting, Chicago, Ill., first Wednesday in June, 1893.

Society of American Florists.

Wm. R. Smith, Washington, D. C., President; Prof. Wm. Trelease, St. Louis, Vice-president; Wm. J. Stewart, 67 Bromfield St., Boston, Mass., Secretary; M. A. Hunt, Terre Haute, Ind., Treasurer. Place of ninth annual meeting: St. Louis, Mo., August, 1893.

Am. Seed Trade Association.

J. C. Vaughan, Chicago, President; A. L. Don, New York, Secretary and Treasurer. Place of eleventh annual meeting: Chicago, June, 1893. Applications for membership should be addressed to Wm. Meggatt, Chairman membership committee, Wethersfield, Conn.

We propose to mail this paper to every nurseryman, florist and seedsman in the United States, and to leading firms in the same vocations in foreign countries. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments

Types in Peaches.

There are certain characteristics belonging to different varieties of peaches, which separate them into types and strains. Too little attention is paid to these peculiarities in selecting varieties intended for particular localities and certain latitudes. We have need to respect these changes, for they have come about through long continued gradations, influenced by climates, soils, situations and a natural tendency to variation. The trees of the several types and strains are quite distinct, in vigor, habit of growth, color of bark, character of foliage, form and size of flowers. The difference is quite marked in the nursery, where the trees grow side by side in the rows.

PERSIAN TYPE—HALE'S EARLY STRAIN.

The Hale's Early has developed a character and individuality peculiarly its own, and has become the prolific progenitor of a family of varieties remarkable for their extreme earliness, some of them being two or three weeks earlier in ripening than the parent sort. The color of the fruit is greenish white nearly covered with deep rich red, almost purplish in the sun; flesh whitish with a tinge of green. The following list of well known varieties belong to this strain: Alexander, Amsden, Jessie Kerr, Arkansas Traveller, Briggs' May, Waterloo, Wilder, Gov. Garland, Musser, Saunders and Hynes' Surprise. These varieties vary little, however, in season of ripening, quality or appearance, except in Hynes' Surprise, which is later and a perfect freestone, whilst the others adhere to the stone. The flowers are large and withstand well the late spring frosts. The fruit is subject to premature decay, and they are profitable only in favorable locations. They prefer an elevated situation, a well drained soil and a dry climate, succeeding best where irrigation is necessary. The trees are hardy and will probably endure the winters as far north as any variety in cultivation. The growth of the trees in nursery is upright and vigorous, the color of the bark and leaves, during the growing season, have a whitish green tinge, in contra distinction to the yellowish green of some other strains.

[TO BE CONTINUED.]

There are 3200 more nails in a keg of wire 6s than there are in a keg of steel 6s.

The Weather.

JANUARY 31, 1893.—The new year opened with rain, and without any frost in the ground. On the night of the 2nd the thermometer showed 10 degrees of frost, minimum. This freezing weather continued, with varying degrees of frost, until the 28th. From the 2nd to the 12th the degree of frost, at night, varied from 8 to 10 degrees. From the 13th to the 16th was very cold, the degrees of frost ranging from 20 to 28 degrees—ground frozen 10 inches deep. From the 17th to the 19th, slightly warmer. On the night of the 20th the thermometer showed 6 degrees below zero. Weather beautiful, gradually moderating, from the 21st to the 30th, but the frost was not entirely out of the ground until the 30th. Were able to dig in favored spots on the 26th to the 28th. Light snow fell on the 5th, 12th and 13th. On the 18th snow fell to the depth of 8 inches on the level. Four days good sleighing. These temperatures were taken at the lowest points at night. This has been the longest continued spell of cold weather experienced here for fifteen years.

Personal.

We had the pleasure, lately, of calling upon Col. W. R. Stuart, of Ocean Springs, Miss., the "Father of Pecan Culture." The Colonel is a typical Southern gentleman; courteous, hospitable and as enthusiastic in his work as a young man, although he is now over 73 years old. We found him in his young pecan orchard superintending the work of planting some grafted sorts, which originated on his grounds. The Stuart, the variety named for him by Mr. Van Deman, we think the ideal sort, and we paid a handsome price for a few trees to propagate from. Judging from what we saw there, pecans bear transplanting from the nursery to the orchard with much better success than we supposed, very few having died from those transplanted last year.

Mr. J. I. Newson has sold a fourth interest in the Commercial Nurseries, Nashville, Tenn., to his son, A. W. Newson.

Mr. D. N. Graves, of the firm of H. C. Graves & Son, Council Bluffs, Iowa, spent one day here on business on his way South. He had some fine samples of apple seedlings with him.

The date for the World's Horticultural Congress has been set to begin in Chicago August 16th, to continue four days.

Advertisements.

The advertisements in this paper should be read with interest, for they represent the leading firms in the trade. If you wish to buy anything in their line, give these firms the preference. For our sake, always kindly mention THE PRACTICAL NURSERYMAN, in writing.

Domestic Figs.

People living on the Gulf Coast have a saying that unless fig trees are planted near enough to the house to smell your breath, they will not thrive. The house yards usually contain only one or two trees each, and it is said that any effort made to increase the number has resulted in failure. Many of these trees are from thirty to fifty years old and very productive. No doubt there is a better reason than the one given for the limited number of trees planted; but this remains to be discovered.

New and Rare Varieties.

The Early Lamaurie cherry is a large black cherry ripening with, or a little earlier, than Early Purple Guigne. The tree is very vigorous, and holds its foliage better South than any of the sweet varieties we have tested. It is a very promising sort, especially for the South.

Curiosities in Advertising.

We print below exact copies of two advertisements which appeared in a late number of the Texas Farm & Ranch. The much agitated question of "Piece Roots vs. Whole Roots" seems to be stated with terseness and exactness. Arguments are exhausted:

"Piece Root Process"

And Valuable Catalogue Free, address

STELL & CLARK, PARIS, TEXAS.

We are now very busy taking up trees and shipping South and West. Orders should be sent in promptly.

We are offering a few Roses in this list. They are very handsome plants and the price is low.

Notice inducements offered on 21st page on small trees for transplanting in nursery rows.

We extend our offer to sell LeConte 2 years old at 25 per cent. off regular quotations, and Marianna at one-half the regular quoted prices of Plums, 1 year, on plum.

The one year Marianna trees we offer at half the price of one year plums on plum, have been grown from cuttings, and were cut back to the ground last Spring, and are same shape and just as handsome as budded trees.

We are now booking orders for Northern customers to be forwarded from St. Louis and our other distributing points. We can dig and ship from here in good condition as late as March 1st, but orders should be sent in now and not later than February 15th, as all stock not sold by that date we begin to dig and pack into Assorted Lots for shipment to St. Louis, for sale there as surplus stock. We wish orders as early as possible, so we can reserve the grades and varieties desired. Once packed into boxes in Assorted Lots, the assortment cannot be varied, as we will not open any boxes in St. Louis. All orders from points more conveniently reached from St. Louis, we forward from here by the 15th of February to the 1st of March and hold there in cold storage until wanted. We can ship safely to St. Louis when we could not do so direct to points further North. From St. Louis we can reach all Northern territory in good season. We have made similar shipments from there in Spring, annually, for the past thirteen years.

We have a great advantage to offer here, in early shipments for the North, in Spring. All orders for Spring delivery from the North received in good season, will be shipped free of freight charges to St. Louis, Mo.; Cincinnati, Ohio.; Rochester, N. Y.; and Philadelphia, Pa. The transfer charges at these points to be paid by the purchaser.

UNSOLICITED COMMENDATION.

"AS YOUR TREES ALWAYS DO."

SAN JOAQUIN CO., CAL., DEC. 19, 1892.—The trees I had from you last winter have done finely, and I don't think I lost over ten out of the 960 sent. I planted them on my town lot and they were too much crowded. The soil is adobe, and cannot be touched when it is wet and is hard as a rock when dry. All I could do with them was to water them from my tank about once in two weeks from April until November. The peaches, plums and apricots stand higher than my head, and are well branched from one foot up. The pears have not gained much, and the cherries don't seem to like the sun and only doubled their size. A few cherries that I planted on the east side of my house have grown from their two feet to over seven feet; showing that cherries want it a little cooler or shaded, for those exposed to the sun wilted nearly every day unless soaked with water. You never saw such trees as the two winter Bartlett's I received from you. I left nearly all their tops on, and they are now about two feet higher and the bark is clean and bright to the ground. I would not take \$5 apiece for them. I had a row with the inspectors for selling imported trees without a certificate of inspection. I told them I would give them \$25 to prosecute me under that law. If they could show that the trees are diseased or infested with insects, of course they could make me pay damages, but not on account of shipping them from Alabama. They searched them over with magnifying glasses, but of course failed to find a louse. I then directed their attention to a few trees I had planted the year before from a California nursery, which were covered with aphids and scale, and I told them that the eastern nurserymen were too intelligent and independent to submit to Californian tyranny, and were just waiting to have a test case taken to the United States courts. They won't be likely to trouble me again. They offered me a certificate of inspection, but I would not take it, and told them I should continue to sell trees from Alabama without a certificate, and they could find me at home at any time. One of them told me afterwards that I was right about it, and I think I may yet order some trees for his orchard.

	9 00	85 00

We ask particular attention to our quotations on small trees, which we recommend for transplanting into nursery rows. They should make saleable trees in the Fall of 1893 and Spring of 1894. Terms—for trees for transplanting, to parties entitled to credit, note bearing eight per cent. interest, payable May 1st, 1894.

The trees offered on these terms are Dwarf Pears, 2 years, 2 to 3 feet and 1 to 2 feet; Plums, 1 year, 3 to 4 feet and 2 to 3 feet; Peaches and Apricots, 2 to 3 feet and 1 to 2 feet. We have a lot of Keiffer, LeConte and Orange Quince, 1 year grafts, root and top pruned, for our planting, that we will sell @ \$50 per 1000; \$6.00 per 100. These trees for transplanting must not be required before the 15th of February, but orders can be sent in at any time.

THE HUNTSVILLE WHOLESALE NURSERIES PRICE LIST.

Terms and Conditions Governing Quotations in the Price List of the Huntsville Wholesale Nurseries.

RATES.—As we send this list to the trade only, we make the difference in prices between the 10, 100 and 1000 rates very slight—simply sufficient, as a rule, to cover the difference in the expense of handling in the smaller numbers. We uniformly tie in bunches of 10, when consistent with the order, and we suggest to our customers to make their orders for varieties in multiples of 10 as far as practicable. Orders for 50 and not over 300 trees, if for not less than 10 of a variety, will be charged at the rate per hundred. Orders requiring 300 trees or more, and not less than 10 of a variety, will be filled at the lowest quoted prices. Orders for less than 10 trees of one variety, will be charged at the rate per ten.

SEASON.—Our packing and shipping season begins by the 20th of September, and continues until about the first of March.

We have great advantages to offer here in early shipments for the North in Spring. We do not accept orders for trees we do not grow, as we never buy trees to sell again. You can depend upon us for fresh dug trees. Each order is taken up separately, and not until it is wanted for shipment.

SHIPPING DIRECTIONS.—We respectfully beg our patrons to furnish us with explicit *directions as to shipping*, and the mode of conveyance by which they desire trees forwarded. When no particular directions are given, we forward according to the best of our judgment. *But in no case do we assume any responsibility as to safe delivery and condition of Trees and Plants after a proper shipment by us.*

RELEASE.—When prepayment of freight is not required, we will Release and Guarantee, and take forwarder's receipt and mail to consignee. It is left to the option of the shipper of trees over some railroads, whether he will release them or not under the clause "Value less than \$5.00 per 100 lbs." If released under this clause, the freight is less on roads governed by this classification, and we will assume it to be proper to make this release, without reference to the value of the trees, unless instructed to the contrary. This clause does not apply upon roads under some of the district classifications, and because of this confusion we will not be held responsible for any oversight to release, unless instructed by our customers. Claims for delay or loss must be made to the forwarders.

PACKAGES.—The cost of package must be added to the prices quoted in this list, as follows:

Boxes 30 inches square, from 7½ to 9 feet long, as the trees may require, each \$2.50; boxes 24 inches, \$2.00; boxes 18 inches, \$1.50; bales from 25c. to 75c. each. No charges will be made for delivering goods to the depot.

PACKING.—Goods will be packed in moss, and especial care taken to insure their arrival in the best condition.

ASSORTMENTS.—We do not require customers to take an assortment they do not wish, but will sell one variety alone if desired. If any substitution can be allowed, either in grade or variety, it should be so stated when making the order. As a rule we do not substitute without permission.

CAUTION.—We accept all orders upon the condition that they shall be void, should any injury befall the trees from frost, hail, storm, fire, or other causes over which we have no control.

TERMS.—Cash. When desired, we will allow 30 to 60 days from date of shipment, to responsible,

prompt-paying customers. Parties with whom we have had no business transactions, will save time by sending reference, Bank, if possible, with order. We wish it expressly understood that payment is expected from the first collections made, and the time named is only intended as so many days of grace in which to make returns. To northern customers, who wish to lay in stock for Spring trade, we will ship late in Fall or early in Spring, and allow time for payment till May 15th. If shipment is required in the Fall for Spring use, a note is to be given upon receipt of the trees. We do not allow any discount for cash, but we make our prices low to command cash, or prompt returns. In orders when the time is not mentioned, 30 days is to be understood. Interest at the rate of 8 per cent. per annum must be paid on over due accounts. Should prices be changed, either higher or lower, during the season, the prices ruling at the time the order is made, are expected to stand.

FORMS OF PAYMENT.—All bills are payable at the office of the seller, and remittances should be made by drafts on New York, Chicago or St. Louis, or by money orders on some Express Company, or by postal orders. We will, however, accept checks from those of our customers who may be located at places having no banking, express or postal facilities, provided they make them in every case payable "with exchange", or add ¼ of one cent, to the amount of the bill, for the cost of collection.

GRADES.—We grade very carefully, in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern, as the height then named is only to be considered approximately. When graded by height or caliper, we include the lower number and exclude the higher. Instance: in a grade of 4 to 5 feet trees, the 4 feet trees are included, but not the 5 feet trees. If 5 feet trees are wanted, the 5 to 6 feet grade must be ordered.

GUARANTEE OF GENUINENESS.—While we exercise the greatest diligence and care to have all our Trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

ACCEPTANCE.—Notice should be sent us by telegraph, at our expense, if there is any cause of complaint, or should the trees be refused, stating reasons. Claims for deduction, from whatever cause, will receive consideration only when made promptly upon the receipt of the trees. If trees show any signs of shrivelling upon arrival, they can usually be restored by being thoroughly watered and buried entirely under the ground for two or three days. Should there be any frost in the trees upon arrival, the boxes should not be opened until the frost is all out. The presence of frost in the boxes is not to be considered an evidence of bad condition, as we pack to secure the trees against damage, if the frost is allowed to come out in the natural way. Goods will be considered accepted if removed from the boxes in which they are packed, without notice of complaint to us, and without our orders for their disposition.

SPRAY YOUR FRUIT TREES & VINES

Wormy Fruit and Leaf Blight of Apples, Pears, Cherries, and Plums prevented; also Grape and Potato Rot—by spraying with **Stahl's Double Acting Excelsior Spraying Outfits**. Best in the market.
